

CHRIS HADFIELD

CHRIS HADFIELD

WORLD RENOWNED ASTRONAUT | BESTSELLING AUTHOR | MUSICIAN

“Good morning, Earth!”

That is how Colonel Chris Hadfield — writing on Twitter — woke up the world every day while living for five months aboard the International Space Station. Referred to as “the most famous astronaut since Neil Armstrong,” Hadfield is a worldwide sensation. His video of David Bowie’s “Space Oddity” has been seen by more than 75 million people, and was called “possibly the most poignant version of the song ever created” by Bowie himself.

A globally recognized and trusted Canadian icon, Hadfield is celebrated for making outer space accessible to millions, and for infusing a sense of wonder into our collective consciousness not felt since humanity first walked on the Moon.

Through his 21-years as an astronaut, which included three spaceflights and 2600 orbits of Earth, Hadfield is a pioneer of many historic “firsts”. In 1992, he was selected as a NASA Mission Specialist — Canada’s first fully-qualified Space Shuttle crew member. Three years later, aboard Shuttle Atlantis, he was the first Canadian to operate the Canadarm in space, and the first Canadian to board a Russian spacecraft as he helped build space station “Mir.” In 2001, aboard Shuttle Endeavour, Hadfield performed

two spacewalks — the first Canadian to do so — and, in 2013, he was Commander of the International Space Station — the first and only Canadian to ever command a spaceship so far.

During his multi-faceted career, Hadfield has intercepted Soviet bombers in North American airspace, lived on the ocean floor, been NASA's Director of Operations in Russia, and recorded science and music videos seen by hundreds of millions.

A heavily decorated astronaut, engineer, and pilot, Hadfield's many awards include the Order of Canada, the Meritorious Service Cross, and the NASA Exceptional Service Medal. He was named the Top Test Pilot in both the US Air Force and the US Navy, and has been inducted into Canada's Aviation Hall of Fame. He has also been commemorated on Canadian postage stamps, Royal Canadian Mint coins, and on Canada's newest five-dollar bill (along with fellow astronauts Steve MacLean and Dave Williams). In 2018, he received a star on Canada's Walk of Fame.

Hadfield is also a bestselling author, whose books have sold more than one million copies worldwide, an acclaimed musician, and the host of two internationally acclaimed television series.

Clip: *Astronauts: Do You Have What It Takes?* (2017)
Chris Hadfield talks about the experience of being outside the International Space Station on a spacewalk and finding himself temporarily blinded.

One Strange Rock

Hadfield co-hosts a 10-part *National Geographic* series, directed by Darren Aronofsky, with actor Will Smith. It explores the fragility and wonder of one of the most peculiar, unique places in the universe: Earth.

PUBLICATIONS

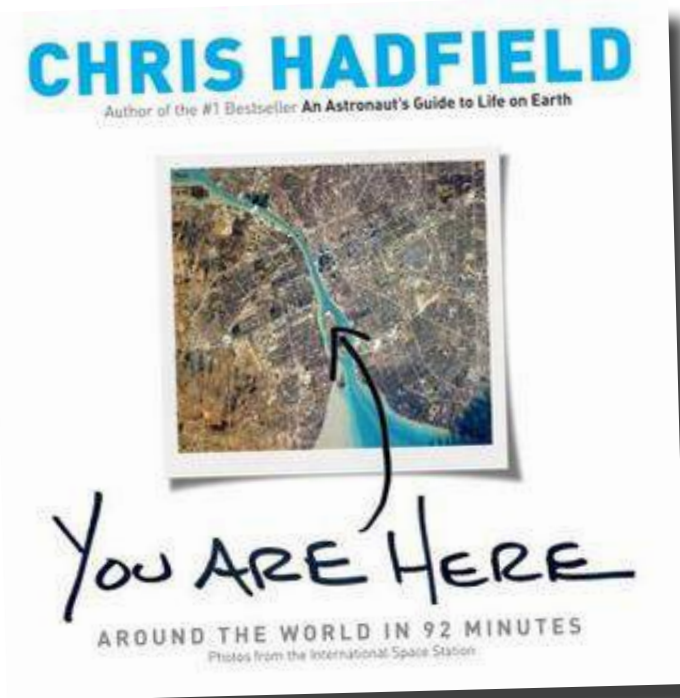

An Astronaut's Guide to Life on Earth

As Commander of the International Space Station, Hadfield captivated the world with stunning photos and commentary from space. Now, he offers readers extraordinary stories from his life as an astronaut, and shows how to make the impossible a reality.

You Are Here: Around the World in 92 Minutes

You Are Here is a perfect storm of a book. It's a combination of elegant and evocative photographs and informative and thoughtful commentary that will inspire you to reflect on how ingeniously we have made the Earth our home.

The Darkest Dark

This children's book deals with our fear of the dark, seen through the eyes of Hadfield.

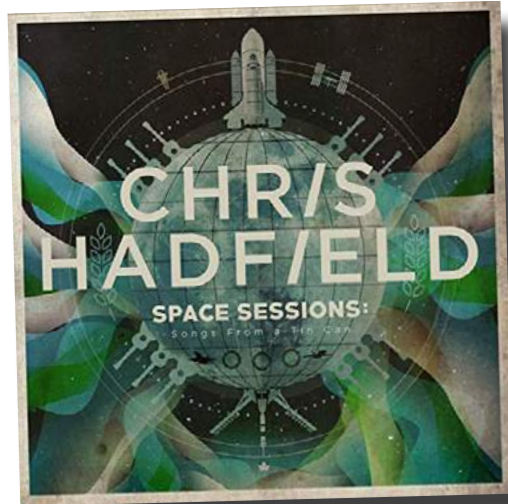

CHRIS HADFIELD

MUSIC

Space Sessions: Songs From a Tin Can

Hadfield shares music that's out of this world, with an album that he wrote and recorded while in space. The first "off planet" album ever made, it includes his world-famous cover of David Bowie's "Space Oddity".
